LTS Mopping System

920078 | Red

920079 | Blue

920080 | Green

920077 | Yellow

Superb Long Tall Sally with ergonomic wringer and highly durable mobile bucket. Works with Kentucky mopping.

- ① Fill up your appropriately-coloured LTS bucket with water to the base of the wringer, then add the required chemical.
- ② Place your mop into your bucket of solution, before inserting into the wringer and pressing the lever down firmly to remove excess water. Always lay the mop in the wringer flat, do not twist it.
- ③ Always start mopping by going around the edges, then work backwards and move your mop in overlapping motions, making sure every area is covered. Once the mop becomes dirty, the Colour Changer can be flipped over for a new clean mopping surface.
- ④ To finish, wring out mop and use a dabbing motion to absorb up any excess liquid that might remain.

Remember: before beginning any cleaning task always put out your Safety sign to warn others of any slip or trip hazards.
