In operation since 2000, Decitex is a manufacturer of specialist textile products for the professional cleaning market. Supplying a range of products, including cleaning cloths and flat mops, Decitex are nationally recognised for the quality of their microfibre products, already ranked number 2 in the area of specially targeted microfibres. With an ever-evolving selection of products available, Decitex keeps at their heart a passion for innovation, as well as a set of core values for commitment to their customers, communities and environment – something they have in common with SYR.

Like SYR, Decitex are committed to finding innovative solutions through research and development, carefully curating designs to maximise performance and continue to deliver the very best for their customers. This is what make them the perfect partner for SYR in our mission to create a safer and simplified world of cleaning, and we are excited to introduce SYR customers to these amazing products.

# **From single-use and reusable cleaning cloths, to dusters and flat mops, Decitex are widely renowned for their high quality microfibre products, but what is it that makes Decitex's microfibre so impressive?**

Created through a process of splitting fibres under high pressure, microfibre is made up of super fine filaments with tiny gaps between the split fibres, allowing dirt to be trapped with the fabric to effectively remove it from surfaces. The quality of the microfibre ultimately determines how well it will perform in cleaning, which is how Decitex products, with their high density weave and super thin fibres, have earned their reputation for offering an exceptional cleaning performance.

With a selection of flat mops available, all of these new microfibre products have been designed to ensure an efficient removal of dirt, dust and even microscopic bacteria from surfaces. Suitable for both wet mopping and dry dusting, many of these mops are also usable with SYR's Flat Mop Frame and Interchange Handles, allowing them to seamlessly be incorporated into your existing cleaning system.

Also available in the new Decitex range is the Fluid II Bacteriostatic. Created after years of research, this versatile handle forms part of a highly effective spray mopping system; the lightweight handle, which has been treated with a specialist antimicrobial treatment to protect the internal surface, has a water capacity of half a litre and triple spray jets for quick and efficient cleaning. To use, simply fit with the Sherlock Flat Mop Frame and your choice of flat mop pad, such as the Ultimate Delux, a durable microfibre mop offering 2-in-1 flatmopping and drying with excellent absorbency and soil removal.

# Fluid II Bacteriostatic

Easy to fill, simply unlock opening and lock after filling.

Simple to follow float system to find out how much liquid is left inside Fluid II handle.

Goldshield®  
antimicrobial treatment  
to inhibit bacterial  
contamination of  
internal Fluid surfaces

DECITEX

Fluid II handle works with both pocket fit Breakframe and hook & loop Sherlock frame

**Breakframe**

Breakframe, which doesn't gather dirt nor require spare parts, is a wear-resistant, hygienic frame. Its magnetic locking system is intuitive and resistant, and ideal for intensive daily use. For pocket style flatmops.

S0623000 **Breakframe**

**Sherlock Frame**

Premium lightweight aluminium frame with movable ball joint for easy access under furnitures. Its patented mop handle to frame ball design connector allows easy hands-free attachment of mopheads. 40cm wide.

S0622000 **Sherlock**

**Fluid II Bacteriostatic Waterfed Pole**

Fluid II features an aluminum rod connecting the colour coded finger release trigger for nozzle actuation as well as the Goldshield® antimicrobial treatment to inhibit bacterial contamination of internal Fluid surfaces.

- S0638291 **Red**
- S0638293 **Green**
- S0638292 **Blue**
- S0638294 **Yellow**

Triple spray jets

Reduces water usage

Pads sold separately. Found on pages 9-12.

# Sherlock Frame

Sherlock frame can also be used in conjunction with the Fluid II Bacteriostatic handle

Our newest flat mopping frame features an innovative slide-across feature, this works in conjunction with the ball joint to provide a new level of ergonomics and access when dealing with hard to reach areas under counters, chairs and tables.

Holding the handle firmly, use the side of your foot to kick the ball joint, sliding it along the rail and locking it into the end of the frame.

Lockable pivot for easier cleaning on walls and awkward angles

Simple hook and lock system to attach and swap pads

Ergonomic and perforated grip for extended periods of use

Smooth bearing allows for free rotation of grip from handle

Handle is extendable with a screw lock function

**Sherlock**

Premium lightweight aluminium frame with movable ball joint for easy access under furnitures. Its patented mop handle to frame ball design connector allows easy hands-free attachment of mopheads. 40cm wide.

S0622000 **Sherlock**

**Aluminium Frame**

Premium lightweight aluminium frame. Its patented mop handle to frame ball design connector allows easy hands-free attachment of mopheads. 30cm wide.

S0627000 **30cm Frame**

**Breakframe**

Breakframe, which doesn't gather dirt nor require spare parts, is a wear-resistant, hygienic frame. Its magnetic locking system is intuitive and resistant, and ideal for intensive daily use. For pocket style flatmops.

S0623000 **Breakframe**

**Watson Handle**

Telescopic handle. The grip points rotate freely to provide incredibly easy and instinctive mopping motion and grip, helping to reduce musculoskeletal disorders (MSD).

S0621000 **Watson handle**

### Ultimate DX1 SYR Flat Mop

Ultimate Dx1 is designed to adapt to all floor types. Its white colour allows you to see the dirt after use and the result of your work. The scrapers enhance the mechanical effect for easy removal of dirt. Fits the below frame.

||???
